Subject Index: Volume 35, 2002

Aberrant conduction
almokalant-induced, 201
Ablation. *See* **Radiofrequency catheter ablation; Surgical ablation**
Acidosis
effects on sinus node pacemaking, 115
β-Adrenergic receptor modulation of propafenone sodium current block, 343
After-potentials
multiple delayed, in biventricular dysplasia, 289, 291
Age
digoxin effects on electrocardiogram and, 213
QT dispersion and QT interval in left ventricular ejection fraction and, 223
Almokalant
induction of aberrant conduction, 201
Angioplasty
postoperative prediction of regional wall motion, 1
Anterior myocardial infarction
with adjacent ischemia, exercise-induced ST-segment elevation and, 193
R-wave voltage changes, clinical significance of, 173
Antiarrhythmic surgery outcome
influence of body surface mapping on, 35
Arrhythmias. *See also specific arrythmias*
differentiation on ECG by coherence spectra, 59
duration, almokalant-induced QRS aberrations and, 201
Asynergy
catecholamine cardiotoxicity and, 351
Atenolol
frequency-dependent block of sodium current by propafenone and, 343
Atrial capture
caused by rate-dependent facilitation of conduction in ischemic atrium, 81
Atrial effective refractory periods
in paroxysmal atrial fibrillation, 227
Atrial fibrillation
almokalant-induced QRS aberration during, 201
differentiation from ECG with coherence spectra, 59
immediate recurrence after internal cardioversion, 313
paroxysmal, dispersion of refractoriness in, 227
Atrial flutter radiofrequency ablation
double potentials at cavotricuspid isthmus and, 321
Atrial ischemia
rate-dependent facilitation of conduction causing atrial capture, 81
Atrial refractoriness dispersion
in paroxysmal atrial fibrillation, 227
Atrioventricular delay
abrupt and sustained shortening during sinus rhythm in DDR pacemaker patient, 139
Atrioventricular second-degree block
bradycardia-dependent, 153
Autonomic tone
short-lasting asymptomatic PSVT and, 135
A-V nodal tachycardia
nonparoxysmal, radiofrequency ablation of, 75

Bazett's formula modification
for QT interval evaluation in rhesus monkeys, 333
Beat-to-beat QT interval variability
in acute myocardial ischemia, 19
Biphasic truncated exponential waveforms
efficacy of transthoracic defibrillation and, 45
optimization of, 235
Bipolar leads
right-infraclavicular *vs.* unipolar leads for digitized ECG, 125
Body surface potential mapping
differentiation of syndrome X from coronary artery disease, 181
isointegral QRST peak-to-trough amplitude, normal variability of, 327
ventricular antiarrhythmic surgery outcome and, 35
Bradycardia
sinus node reentrant tachycardia and, 363
Bradycardia-dependent block
advanced second-degree atrioventricular, 153
bundle branch block alternans, 147
Brain anoxia
idiopathic cardiac asytole and, 279
Brain natriuretic peptide
reversible left ventricular dysfunction and, 351
Brugada syndrome
with pectus excavatum, 169
Bundle branch block
alternans, electrogenesis of, 147
QT dispersion and QT interval in left ventricular ejection fraction and, 223

Caffeine
diastolic depolarization in sheep and dog Purkinje fibers and, 253

Calcium
diastolic depolarization in sheep and dog Purkinje fibers and, 253
effect on sinus node pacemaking, 115
Cardiac asytole
idiopathic, presenting as epileptic seizures, 279
Cardiac functional improvement
reversibility of R-wave voltage in anterior myocardial infarction and, 173
Cardiac surgery
left atrial myxoma tumor excision, effect on ECG, 53
Cardiomyopathy
catecholamine cardiotoxicity and, 351
Catecholamines
post myocardial infarction with exercise-induced ST-segment elevation, 193
reversible left ventricular dysfunction and, 351
Cavotricuspid isthmus
double potentials for radiofrequency ablation of atrial flutter, 321
Cesium
diastolic depolarization in sheep and dog Purkinje fibers and, 253
Chest wall landmarks
for serial ECG in diagnosing myocardial infarction with LBBB, 299
Circadian variation
of short lasting symptomatic paroxysmal supraventricular tachycardia, 135
Computer detection system
for ST segment and T wave changes in long duration ECGs, 27
Computer modeling
of effects of electrolyte and pH changes on sinus node pacemaking, 115
Concealed electrotonic conduction
bradycardia-dependent second-degree atrioventricular block, 153
Conduction system disease
microcomplex QRS pattern and, 273
Coronary angioplasty
ST-segment re-elevation after, 87
Coronary artery disease
noninvasive differentiation from syndrome X, 181

Defibrillation
efficacy of BTE, QTE and Edmark waveforms, 45
transthoracic ventricular, optimization of truncated exponential waveforms for, 235
Detection schemes
for differentiation of atrial fibrillation from sinus rhythm on ECG, 59
Diastolic depolarization
in Purkinje fibers under induction of overdrive suppression, 253
Digitized electrocardiogram
of QT dispersion and QT interval in left ventricular ejection fraction, 223
right-infraclavicular bipolar leads *vs.* unipolar V lead with bipolar II lead, 125
Digoxin
electrocardiogram effects in healthy middle-aged and elderly patients, 213
Dipole analysis
of ventricular activation, magnetocardiography of, 105
Disopyramide body surface potential mapping
for differentiation of syndrome X from coronary artery disease, 181
Dispersion of refractoriness
global and local of ventricular repolarization, 159
in paroxysmal atrial fibrillation, 227
proarrhythmic effect of hypokalemia/hypomagnesemia and, 245
P-wave, seasonal variation in healthy subjects, 307
Dogs
Purkinje fiber diastolic depolarization mechanisms, 253
transthoracic defibrillation efficacy of BTE, WTE and Edmark waveforms, 45
Double potentials
at cavotricuspid isthmus for radiofrequency ablation of atrial flutter, 321
Double ventricular response
caused by longitudinal dissociation in His bundle, 69
Dual chamber pacemaker
abrupt and sustained shortening of AD delay during stable sinus rhythm, 139

Edmark waveforms
transthoracic defibrillation efficacy of, 45
Effective refractory period
hypokalemia/hypomagnesemia and, 245
Elderly
electrocardiogram, digoxin effects on, 213
microcomplex QRS pattern in, 273
unusual atrial response to electrical pacing during ischemia, 81
Electroanatomical mapping system
for A-V nodal tachycardia for radiofrequency ablation, 75
for endocardial MAP mapping in swine and humans, 159
Electrocardiogram
of beat-to-beat QT interval variability in myocardial ischemia, 19
Brugada-type in pectus excavatum, 169
digitized, comparison of bipolar and unipolar leads, 125
digoxin effects in healthy middle-aged and elderly patients, 213
in future, 293
of intermittent left bundle branch block at slow heart rate, 143
left atrial myxoma, effect of tumor size on, 53
multiple delayed after-potentials extending into T wave, 289, 291
optical waveform recognition, 285
of primary revascularization *vs.* thrombolysis in AMI, 11

ST-segment re-elevation after successful reperfusion, 87
Electrolytes
effects on sinus node pacemaking, 115
Entrainment
of atrial flutter, double potentials at cavotricuspid isthmus and, 321
Epileptic seizures
idiopathic cardiac asytole and, 279
Epsilon waves
in biventricular dysplasia, 289
Exercise testing
almokalant-induced QRS aberration during, 201
digoxin effects on ECG in healthy middle-aged and elderly patients, 213
ST elevation-derived ST/HR slope, predictive value of, 1
ST-segment elevation, myocardial ischemia location and, 193
Expert system, rule-based
for detection of ST-segment deviation and T-wave alterations in long duration ECGs, 27

Females
almokalant-induced QRS aberrations and, 201
Fluid shifts
in vasovagal syncope, P-wave duration and, 303

Head-upright tilt table testing
for vasovagal syncope on P-wave duration, 303
Healthy subjects
digoxin effects on electrocardiograms of, 213
seasonal variation of P-wave dispersion in, 307
Heart block
incomplete, microcomplex QRS pattern in, 273
Heart rate
effect of electrolyte and pH changes on, 115
QT dispersion and QT interval in left ventricular ejection fraction and, 223
short-lasting asymptomatic PSVT, circadian variation of, 135
slow, with intermittent left bundle branch block, 143
variability in acute myocardial ischemia, 19
Heartstream Forerunner
biphasic transthoracic defibrillation efficacy *vs.* Edmark and quadriphasic waveforms, 45
Heart transplant patient
biventricular dysplasia in, 289, 291
His bundle
longitudinal dissociation in, 69
Holter electrocardiogram
of QT interval in conscious rhesus monkeys, 333
Hypokalemia
proarrhythmic effect, apex-to-base dispersion of refractoriness and, 245
Hypomagnesemia
proarrhythmic effect, apex-to-base dispersion of refractoriness and, 245

Inferior myocardial infarction
myocardial salvage with primary revascularization *vs.* thrombosis in, 11
Internal cardioversion
atrial fibrillation recurrence after, 313

Left bundle branch block
intermittent, causing "linking" phenomenon, 143
myocardial infarction with, diagnosis of, 299
Left ventricle size
QT dispersion and QT interval in left ventricular ejection fraction and, 223
Left ventricular ejection fraction
almokalant-induced QRS aberrations and, 201
biological correlates of QT interval and QT dispersion in, 223
ST-segment re-elevation after successful reperfusion and, 87
Left ventricular hypertrophy
secondary to perinephritis-induced hypertension, 245
Left ventricular tachycardia
verapamil-sensitive idiopathic, reentry circuit in, 357
Left ventricular volume
ST-segment re-elevation after successful reperfusion and, 87
Linking phenomenon
bundle branch block alternans and, 147
intermittent left bundle branch block and, 143
Longitudinal dissociation
in His bundle causing double ventricular response, 69
Loose-patch-clamp technique
frequency-dependent block of sodium current by propafenone, 343

Magnesium
proarrhythmic effect, apex-to-base dispersion of refractoriness and, 245
Magnetocardiography
of moving dipoles of ventricular activation, 105
Monophasic action potentials
in D0870-induced torsades de pointes, catecholamines and, 181
hypokalemia/hypomagnesemia and, 245
in swine and humans, electroanatomical mapping system for, 159
Myocardial infarction
comparison of primary revascularization *vs.* thrombolysis in, 11
diagnosis in presence of left bundle branch block, 299
healed, prediction of regional LV function in, 1
postinfarction surgical ablation, influence of body surface mapping on, 35
ST-segment re-elevation, LV volume and function after successful reperfusion, 87
Myocardial ischemia
beat-to-beat QT interval variability in, 19

digoxin effects on electrocardiogram, 213
location, exercise-induced ST-segment elevation and, 193
unusual atrial response to electrical pacing during, 81
Myocardial refractoriness
microcomplex QRS pattern and, 273
Myocardial repolarization
in acute myocardial ischemia, 19
Myocardial salvage
comparison of primary revascularization *vs.* thrombolysis in AMI, 11

Nonarrhythmia clinical electrocardiography
future of, 293
Nonlinear analysis
of RR-QT dynamics, 95
Norepinephrine
post myocardial infarction with exercise-induced ST-segment elevation, 193
reversible left ventricular dysfunction and, 351

Overdrive
diastolic depolarization in sheep and dog Purkinje fibers and, 253

Pacemaker Wenckebach response
abrupt and sustained shortening of AV delay during stable sinus rhythm, 139
Paroxysmal atrial fibrillation
dispersion of refractoriness in, 227
Paroxysmal supraventricular tachycardia
short-lasting asymptomatic, circadian variation of, 135
Pectus excavatum
Brugada-type electrocardiogram, 169
pH increase
effect on sinus node pacemaking, 115
Pigs
endocardial MAP mapping, electroanatomical mapping system for, 159
Postoperative outcome
of ventricular antiarrhythmic surgery, influence of body surface mapping on, 35
Potassium
effect on sinus node pacemaking, 115
proarrhythmic effect, apex-to-base dispersion of refractoriness and, 245
Potassium channel blocking agent
induction of QRS aberration, 201
Premature ventricular contractions
magnetocardiography of, 105
Proarrhythmic effect
of hypokalaemia/hypomagnesaemia, apex-to-base dispersion of refractoriness and, 245
Propafenone
sodium current block modulated by β-adrenergic stimulation, 343
Protection potential
bundle branch block alternans and, 147
P terminal force
left atrial myxoma tumor size and, 53
Purkinje fibers
diastolic depolarization mechanisms, 253
P-wave duration
difference between maximum and minimum, seasonal variation in healthy subjects, 307
fluid shifts in vasovagal syncope and, 303
left atrial myxoma tumor size and, 53

QRS complex
almokalant-induced aberrations, 201
digoxin effects on ECG in healthy middle-aged and elderly patients, 213
microcomplex pattern, 273
moving dipole analysis by magnetocardiography, 105
QRST area
body surface map peak-to-trough amplitude, normal variability of, 327
QT interval
beat-to-beat variability, in acute myocardial ischemia, 19
evaluating in conscious rhesus monkeys by Holter electrocardiography, 333
relationship with RR, symbolic dynamics of, 95
Quadriphasic truncated exponential waveforms
transthoracic defibrillation efficacy of, 45

Rabbit heart
proarrhythmic effect of hypokalemia/hypomagnesemia in, 245
Radiofrequency catheter ablation
for atrial flutter, double potentials at cavotricuspid isthmus and, 321
of nonparoxysmal A-V nodal tachycardia, 75
Rat
propafenone sodium current block modulated by β-adrenergic stimulation, 343
Recurrence
of atrial fibrillation recurrence after internal cardioversion, 313
Reentrant tachycardia
associated with respiration, 363
Reentry circuit
with low frequency diastolic potential in ventricular tachycardia, 357
Reperfusion therapy
vs. thrombolysis for inferior myocardial infarction, 11
Respiration
sinus node reentrant tachycardia and, 363
Rest
almokalant-induced QRS aberration during, 201
digoxin effects on ECG in healthy middle-aged and elderly patients, 213
Reverse rate-dependent facilitation
of conduction in ischemic atrium during electrical pacing, 81

Rhesus monkeys
Holter electrocardiography of QT intervals in, 333
Right atrial conduction variations
immediate recurrence of atrial fibrillation after internal cardioversion an, 313
Right atrial pressure
QT dispersion and QT interval in left ventricular ejection fraction and, 223
Right bundle branch block
on alternate beats, 147
Right-infraclavicular bipolar leads
vs. unipolar chest V leads with bipolar lead II, 125
RR interval
in rhesus monkeys, Holter electrocardiography of, 333
RR-QT dynamics
gender differences in, 95
R-wave voltage changes
clinical significance in anterior myocardial infarction, 173

Seasonal variation
of P-wave dispersion in healthy subjects, 307
Seizures
idiopathic cardiac asytole and, 279
Serial electrocardiograms
for myocardial infarction detection in presence of left bundle branch block, 299
Sheep
Purkinje fiber diastolic depolarization mechanisms, 253
Single-photon emission computed tomography
defect-discordant ratio in anterior myocardial infarction, 173
Sinus node pacemaking
effect of electrolyte and pH changes on, 115
Sinus rhythm
differentiation from ECG with coherence spectra, 59
Sinus tachycardia
reentrant associated with respiration, 363
SmarTracking function
abrupt and sustained shortening of AD delay during stable sinus rhythm, 139
Sodium current
blockage by propafenone, modulation by β-adrenergic stimulation, 343
Spectral analysis
for differentiation of atrial fibrillation from sinus rhythm on ECG, 59
ST/HR slope
in predicting regional LV functional improvement, 1
Stimulation-excitation interval
atrial prolongation paralleling severity of ischemia, 81
ST-segment deviations
in diagnosing myocardial infarction with left bundle branch block, 299
digoxin effects on ECG in healthy middle-aged and elderly patients, 213
in long duration ECGs, computerized detection of, 27
ST-segment elevation
in biventricular dysplasia, 289, 291
on exercise, predictive value of ST/SHR slope from, 1
exercise-induced, myocardial ischemia location and, 193
re-elevation unrelated to LV ejection fraction or volume after AMI, 87
ST-segment recovery
digoxin effects on ECG in healthy middle-aged and elderly patients, 213
Supernormal conduction
bundle branch block alternans and, 147
Surgical ablation
of postinfarction ventricular tachycardial, effect of body surface mapping on outcome, 35
Symbolic dynamics method
for RR *versus* QT relation assessment, 95
Synchronized shock delivery
for optimization of transthoracic ventricular defibrillation, 235
Syndrome X
noninvasive differentiation from coronary artery disease, 181

Tachycardia
bundle branch block alternans and, 147
sinus node reentrant tachycardia and, 363
Takotsubo cardiomyopathy
catecholamine cardiotoxicity and, 351
Tetrodotoxin
diastolic depolarization in sheep and dog Purkinje fibers, 253
Thrombolytic therapy
vs. primary revascularization for inferior myocardial infarction, 11
TI/BMIPP discordance
in anterior myocardial infarction, 173
Torsades de pointes
almokalant-induced QRS aberrations and, 201
Transthoracic ventricular defibrillation
optimization of truncated exponential waveforms for, 235
Triphasic shocks
optimization of transthoracic ventricular defibrillation and, 235
T-wave alterans
in long duration ECGs, computerized detection of, 27

Valvular regurgitation
QT dispersion and QT interval in left ventricular ejection fraction and, 223
Vasovagal syncope
on P-wave duration, head-upright tilt table testing for, 303

Ventricular activation
moving dipole analysis by magnetocardiography, 105
Ventricular defibrillation
transthoracic, optimization of truncated exponential waveforms for, 235
Ventricular recovery
QRST amplitude and, 327
Ventricular repolarization
almokalant-induced QRS aberrations and, 201
global and local dispersion of, 159
Ventricular tachycardia
surgical ablation, influence of body surface mapping on outcome, 35
verapamil-sensitive idiopathic, reentry circuit in, 357
Ventriculogram
after successful reperfusion, ST-segment re-elevation and, 87
Verapamil-sensitive idiopathic left ventricular tachycardia
with low frequency diastolic potential, 357

Wall motion, regional
prediction of improvement by ST/HR slope, 1
Wolff-Parkinson-White syndrome
dipole analysis of ventricular activation by magnetocardiography, 105
